Art Unit 1713

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ 2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-49 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2 and 6-27 of copending application Serial No. 09/419,571. Although the conflicting claims are not identical, they are not patentably distinct from each other because the two phase limitation of the instantly claimed gel composition is seen to be inherently met by the claims of the application in that the chemically different ingredients in the copending application would inherently separate and thus form a multiphase system. The solvent ingredient is seen to be rendered obvious by the additional ingredients within the claims of the pending application as well. The solvents are seen to be oils and/or waxes and these oils and waxes are seen to be species of the generically claimed liquids within the claims.

Art Unit 1713

This is a *provisional* obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-49 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Morrison, U.S. Patent 6,433,068.

This patent discloses gel compositions which can be based on applicants' instantly claimed ester component and block copolymer. See specifically columns 3 and 4. The instantly claimed solvent is rendered obvious by the disclosure at column 4 lines 40+. While the specific viscosity is not disclosed within this reference, it is seen to be a limitation which is either inherently anticipated or rendered obvious from the disclosure of this reference. This reference teaches the same polymers as well as solvents which fall within the scope of the description of the claims. It is reasonable to presume that the same ingredients when used in combination with one another would have the same
